

ABSTRACT

On the "Distance Learning Course" Measuring Devices 2. Digital Measuring Devices. Control work. Tests."

Y.V.Bobkov, PhD, assoc. prof.

"Distance Learning Course "Measuring devices 2. Digital Measuring Devices. Control work. Tests "" is intend for bachelors of the 152 specialty "Metrology and Information and Measuring Equipment" (field of study 6.051001 "Metrology and information-measuring technologies").

The aim of information resource is to evaluate the knowledge and skills of students at carrying out control works by testing, and to acquire theoretical and practical training students in the field of digital measuring devices.

Methodological materials provided in the form of 100 test tasks and two tests for two control works. Each test for a control work consists of 12 test tasks, which are randomly generated individually for each student from the common base of 100 test tasks in accordance with the content of the material, which is submitted for each module control work.

The materials are placed in a separate database system Moodle at address: <http://moodle.ipk.kpi.ua/moodle/course/view.php?id=881>.
